Moovotukonam

Our teacher Santha is working well in this Center regularly. She is conducting evening study classes to improve the students' educational skills for poor students regularly. I have visited this Center on 08 and 28 in this month. And I had conducted ecology and Environmental science trainings in this center. Twenty Two students participated in the training.

Kodimunai

Our teacher Mrs.Mehala is working well in this Center regularly. She is taking special care to improve the students' educational skills. I visited this school on 09, &23. And I had conducted ecology trainings in this Center. Thirty students participated in the training.

Edaikodu

Our teacher Mrs.Vijaya is working well in this Center regularly. She is taking special care to improve the students' educational skills. I visited this school on 06, &24. And I had conducted ecology trainings in this Center. Twenty Eight students participated in the training.

Devasahayam mound

Our teacher Devasahayam is working well in this Center regularly. He is conducting evening study classes to improve the students' educational skills for poor students regularly. I have visited this Center on 05 and 30 in this month. And I had conducted ecology and Environmental science trainings in this center. Forty students participated in the training

Report:

AIMS teachers are taking special care to improve educational skills for poor students in their Center as regularly. Our teachers had worked twenty (average) days in this month.

We (Mr.Azath & I) had conducted the monthly planning meeting in Azath home on 01/04/2010. In this day we had planned to conduct training continuously about Ecology & Environmental science as usually.

Based upon our monthly planning, I gave a lecture to the students on Ecology & plastic awareness in this month. Much plastic waste has accumulated in our land. Our public is not aware of the harmful effects of pollution from plastics and medical wastes have been infected with many diseases and general ill-health stemming from weakened immune systems. So we had planned to conduct a training to make awareness of plastic. Our work will help our students to make aware of the benefits of using less

plastic. More of 338 students were attending in the training in their center (Average 33 students in a center). We will continue our work in our center as well as possible.

The training subjects are listed below

1 Disadvantages of plastic bags. (Most plastic bags are harmful to the environment.)

2. Recycling plastics

3. Managing our home waste
